

Genealogy Newsletter 'Extra' - July 2019

Ancestry[®] unveil over 225 New Communities for Members who have ties to Australia, Canada, France, New Zealand and the UK...

AncestryDNA[®] with their latest cutting-edge DNA science and technology can now offer detailed historical insights that empower you to uncover more about your family's origins.

Utilizing their DNA network of over 15 million people, together with a vast collection of public family trees, and their patented **Genetic Communities[™]** technology, AncestryDNA is able to identify groups of people with shared DNA and determine where their ancestors most likely lived over the past 75 – 300 years.

With 73 new United Kingdom communities, you might discover a link to your family and learn where your ancestors lived during the bustling Industrial Revolution, which began in the late 1700s. Game-changing advances in agriculture and technology spurred countless countryside bakers, butchers, brewers, tailors, and other rural workers to relocate to opportunity-filled cities, laying the foundation for some of England, Scotland and Wales's great modern cities. A list of all regions can be found here (<http://www.ancestry.com/cs/ancestrydna-regions-update>).
